

Date: 8/5/2020

To All Concerned,

Here at Clearwater HCC we have been doing weekly COVID testing for both residents and employees. As of today 8/5/2020 we have been notified that a few of our residents have tested positive for COVID 19 and employees. We continue to follow the guidelines and direction from CDC and CDPH. We are cohorting our residents to mitigate any further spread and will continue with weekly testing. Our patients are top priority, we will remain committed to delivering the highest possible quality of compassionate nursing and rehabilitation services tailored to the individual needs of all our patients.

All residents and staff members will continue to be tested, unless they have already been tested with a positive result; this test is for the continued monitoring of negative residents who have the potential to become positive. Our staff continue to monitor each resident every shift for any signs or symptoms of Covid-19 and intervene as directed by the physicians.

We will continue to update you with any new information and we appreciate your understanding during this time. If you have any questions, please feel free to contact the facility and we will be happy to assist you.

Thank you for your continued support.

Sincerely,
